DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 6, 8, 10, 11, 14 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent no. 6,634,621 to Keith.

Regarding claims 1, 2, 6, 8, 11, 14 and 15, Keith discloses a lift pulley 10 with a cable thereon; an actuator 22 arranged to turn the pulley 10; an end effector 6 connected to the cable and connectable to the load 2; and a controller 21 for controlling the operation of the actuator 22, the controller 21 being responsive to a first signal from the sensor 12 representing operator-applied force and at least one additional signal (from sensor 14) representing the condition of the cable.

Regarding claim 10, there is a handle 6 on the end effector, wherein the handle moves in response to force exerted thereon by a user, and where movement of the handle causes the generation of the first signal.

Claims 3-5, 7, 9, 12, 13, 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
